

## **2 DOSAGE AND ADMINISTRATION**

### **2.1 Recommended Dosing**

Take one packet daily or in divided doses with or without food according to the healthcare provider's instructions. As directed by supervising medical personnel, the dose can be increased up to 4 packets per day. One packet should be dissolved in 4 oz (120 mL) of water or other non-acidic liquids as preferred, and stirred until fully mixed. Foods such as applesauce or pudding without a strong acidic content may be used instead of liquid to blend the product. ENTERAGAM has been safely consumed for up to one year in clinical studies in adults.
